FOR YOUR INFORMATION

IMPORTANT

Don't be misled by advertisements of **cheap** seed. If prices are much below the usual, **there is a reason**. Don't gamble. Play safe by considering quality **First**.

All seedsmen must buy from the same sources and for a given quality, they must all pay pretty nearly the same price. Therefore, for one to far undersell the others, an inferior quality must necessarily be used.

This inferior quality may be made in different ways; through use of seeds of poor germination, low purity, weediness, mixture, or seed unadapted to your conditions.

Arrow Brand seeds are selected with a view of giving the customer **The Best** in quality in all these angles: purity, germination, freedom from weeds, and adaptability.

Buy Arrow Brand Seeds. And know you are safe on quality and that price is as low as can be made in consideration of that quality.

YOU SAVE HERE

In issuing this miniature catalogue, we have departed from the old custom of printing up costly high colored and uselessly large catalogues, as one of numerous efforts to reduce cost of doing business, so as to pass along to our customers this saving in lower prices and higher quality.

You will note the absence of pictures, etc., but everything you need in a catalogue is here.

We hope you will recognize our aims and that you will find in compact form all the information you desire.

Any suggestions for improvement you feel necessary will be more than welcome and if there is any point we have failed to cover, please do not hesitate to write us.
